

WeatherMAX 80 With HydroMAX+

WeatherMAX with HydroMAX + is the most balanced, cost-effective fabric available for marine cover applications.

Developed in cooperation with industry oem's & fabricators, WeatherMAX combines multiple facets of technology. Super high tenacity yarn for strength & durability, pigment infused color for long-term retention, advanced water repellency & weaving techniques work in unison to deliver the most unique, versatile marine fabric on the market today.

WHAT IS IT?

WHERE DOES IT OUTPERFORM ACRYLICS?

1

With increased strength of 117% warp, 72% weft, WeatherMAX provides unbeatable dimensional stability to prevent sagging & stretching of which acrylics cannot recover.

2

Providing 50% more water resistance, WeatherMAX with HydroMAX + protects with cutting edge technology in a more durable longer lasting finish.

3

Pairing with unbeatable water protection, WeatherMAX remains highly breathable without crazing or color transfer. Maintaining this critical balance is crucial in preventing mold & mildew from developing on interior surfaces.

4

Handling made simple, WeatherMAX is 33% thinner & 14% lighter making WeatherMAX covers easier to store & more compact when storage is at a premium.

5

As manufactures begin their production & financial recovery, WeatherMAX customers continue to take financial advantage of our 20%-25% lower price point versus acrylics.

6

Taking sustainability seriously, WeatherMAX is manufactured to the demanding ISO 14001 standard. Our partners are proud to know they are doing their part to protect the environment by choosing a 100% recyclable material and saving nearly 3 gallons of water per yard of fabric.
