PRODUCT RECALL NOTICE

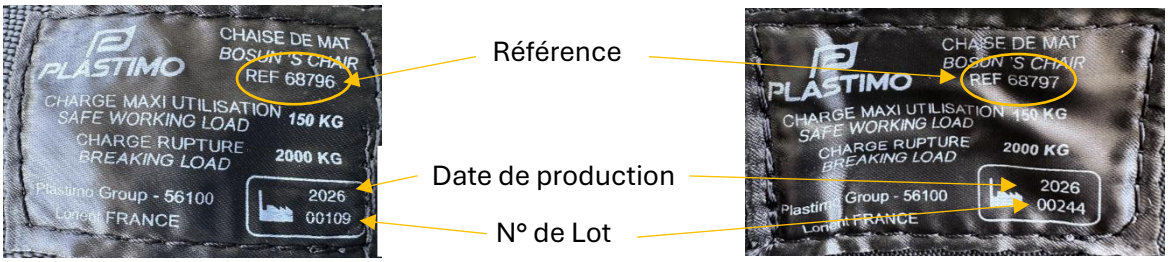
Bosun's chairs purchased from January 2024 onwards

PLASTIMO is issuing this important safety notice, which concerns ONLY PLASTIMO Bosun's Chairs (First and Pro Confort models)

- Despite our rigorous quality-control procedures, customer feedback has reported a failure of the stitching on the suspension straps during use. Tensile tests carried out at our Lorient facility have confirmed this anomaly. This defect exposes the user to a risk of failure under load and a fall from height.

- Your safety is our absolute priority. We have therefore collectively decided to initiate a product recall for all bosun's chairs whose black label, sewn inside the strap, bears a manufacturing date of 2024, 2025 or 2026. All units from these production runs are affected. Identification of the recalled products.

- Please find attached a photograph of the label showing where to locate this date.



- We ask you to immediately stop selling and using these two models. They must be returned for inspection and replacement.

    - **68796 - Bosun's Chair First, black**
    - **68797 - Chaise de mât Pro-Confort noire**

- We ask you to contact any customers to whom you have sold these bosun's chairs, if you have their contact details.

- To enable us to carry out this free-of-charge operation as quickly as possible, we ask all customers in possession of a bosun's chair with one of the references listed above to contact their retailer or write directly to Plastimo at: rappel.chaisedemat@plastimo.com (please include the delivery address to which your product should be returned).

- Information: We kindly ask you to display the attached **official recall notice** in your store for a period of six months.
